

ProstaDecc™

Shrink Enlarged Prostate Naturally.

ProstaDecc Can Deliver Total Relief...

Each hard gelatin capsule contains:

| | |
|---|-----------|
| Flaxseed Hull Lignans 300 mg eq. to SDG | 13.2 mg |
| Murraya Koenigii Ext. | 100 mg |
| Tribulus Terrestris Ext. | 100 mg |
| Saw palmetto Ext. | 10 mg |
| Energy | 1.06 kcal |
| Fat | 0.00 g |
| Protein | 0.15 g |
| Carbohydrate | 0.046 g |
| Dietary Fibres | 0.123 g |

Key Benefits

- Supports healthy prostate function and overall male glandular system.
- Reduced enlarged prostate.
- Helps maintain healthy urinary tract function and male/ female life activities.
- Supports healthy inflammation response.
- Assists in the relief of benign enlarged prostate.
- Relieves urinary urgency.
- Reduces nighttime waking.
- Eliminate (BPH) Symptoms
- 100% Natural formula with no side effects

- ✓ Flax Hull Lignans Secoisolariciresinol Diglucoside (SDG) is a Phytoestrogen which is converted by bacteria in colon into two mammalian estrogen i. e. Enterolactone(ENL) and Enterdiol (EDL).
- ✓ Lignans inhibits 5-alpha-reductase enzyme activity, which converts testosterone into dihydrotestosterone (DHT). DHT is a hormone which causes the prostate to become enlarged and has been linked to prostate cancer.
- ✓ Lignans inhibits the aromatase activity which is responsible for Benign prostatic Hyperplasia(BPH).
- ✓ Lignans have weak estrogenic/anti-estrogenic properties reduced adult relative prostate weight and cell proliferation, suggesting potential protection against prostatic disease, without affecting sex hormone levels.
- ✓ Tribulus contains betasitosterols inhibits 5- alpha-reductase which is responsible for BPH that ultimately control the urinary disorders such as painful micturition, incontinence of urine and cystitis.
- ✓ *Murraya koenigii* contains Mahanine (alkaloids) and found it kills the prostate cancer cells but does not kill other cells.
- ✓ Mahanine seems to block the proteins, AKt and bcl-x that help in fuelling the growth of cancer cells and aiding the survival of cancer cells.
- ✓ Saw palmetto works by inhibiting the enzymes that transform testosterone into dihydrotestosterone (DHT) which causes BPH.
